Let's start writing a journal!

18th June 1770

Two years ago, King George III sent us to the Pacific Ocean. He gave us a mission with different objectives: we had to observe the sky, explore the seas and draw maps of new continents.

I joined my crew aboard the HMS Endeavour. I was very excited because I had never taken part in such a big expedition before.

But I was a little scared too, because travelling on the sea was dangerous and we did not really know where we were going.

But suddenly...

Suddenly, we all felt the ship shake very hard and stop. The ship had run aground after hitting a coral reef.

The Captain decided to carefully sail the ship away and drop anchor just long enough to repair the damage.

Tomorrow we will begin our journey back to England. I can't wait to be back home!
